DETAILED ACTION

1. Claims 19-76 in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose:

Regarding Claims 19-45 and 62-76. The use of a switch for disabling the output force the system processes and installed force feedback effect to determine a force contribution from the installed force feedback effect and outputting a force feedback value based on the determined force contribution to cause a force based on the force feedback value to be outputted by the actuator to the user of the force feedback system, outputting from the actuator to manipulator of a force feedback effect wherein the maximum peak force is related to the maximum power so the actuator can be utilize instantaneously and reducing the output of the maximum peak force to an output of a nominal peak force from the actuator when the power utilized by the actuator exceeds an average power level over a predetermined period of time, wherein the nominal peak force is related to a maximum power that the actuator can utilize in continuous steady-state operation.

Regarding Claims 46-61. Calculating a force feedback effect to contribute to the output of the force feedback actuator, where the force feedback effect uses a force feedback effect type and a magnitude and a force feedback effect comprises an attribute, wherein the attribute consists in combination a stiffness attribute, damping attribute, force attribute and distance attribute.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
